### Notes:

- FDI inward flows and outward flows comprise capital provided (either directly or through other related enterprises) by a foreign direct investor to a FDI enterprise, or capital received by a foreign direct investor from a FDI enterprise. FDI includes the three following components: equity capital, reinvested earnings and intra-company loans.

- Equity capital is the foreign direct investor's purchase of shares of an enterprise in a country other than that of its residence.

- Reinvested earnings comprise the direct investor's share (in proportion to direct equity participation) of earnings not distributed as dividends by affiliates or earnings not remitted to the direct investor. Such profits, retained by affiliates, are reinvested.

- Intra-company loans or intra-company debt transactions refer to short- or long-term borrowing and lending of funds between direct investors (parent enterprises) and affiliate enterprises.

Data on FDI flows are presented on net bases (capital transactions' credits less debits between direct investors and their foreign affiliates). Net decreases in assets or net increases in liabilities are recorded as credits (with a positive sign), while net increases in assets or net decreases in liabilities are recorded as debits (with a negative sign). Hence, FDI flows with a negative sign indicate that at least one of the three components of FDI is negative and not offset by positive amounts of the remaining components. These are called reverse investment or disinvestment.

(1) Data from 1988 to 1991 inclusive refer to Slovenia only, except for the FDI inflows that also cover other Republics of the former SFR Yugoslavia.

(2) Partial data; total USSR territory is not covered.

(3) Data from 1970 to 2001 inclusive refer to Belgium-Luxembourg Economic Union; from 2002 onwards data cover Belgium only.

- CNUCED, *World Investment Report 2011*

Notes :

- Les flux entrants et sortants de l'IED comprennent les capitaux fournis par l'investisseur direct (soit directement, soit par l'intermédiaire d'autres entreprises avec lesquelles il est lié) à l'entreprise d'investissement direct ou les capitaux reçus de cette entreprise par l'investisseur. L'IED est composé des trois catégories suivantes : le capital social, les bénéfices réinvestis et les emprunts intra-compagnie.
  - Le capital social inclut l'achat des actions d'une entreprise située à l'étranger par l'investisseur direct résident dans l'économie déclarante.
  - Les bénéfices réinvestis correspondent à la part qui revient à l'investisseur direct (au prorata de sa participation directe au capital) sur les bénéfices qui ne sont pas distribués sous forme de dividendes par les entreprises apparentées, ainsi que les bénéfices des succursales qui ne sont pas versés à l'investisseur direct. Ces bénéfices retenus par les affiliés sont réinvestis.
  - Les emprunts intra-compagnie ou les transactions intra-compagnie concernant les dettes ou les créances se réfèrent aux emprunts et prêts des fonds à court- ou long-terme entre l'investisseur direct (entreprise parente) et les entreprises apparentées (affiliées).

Les données sur l'IED se présentent sur une base nette (les crédits moins les débits des transactions en capital entre l'investisseur direct et son entreprise apparentée). Les augmentations nettes en passifs et les décroissances nettes en actifs se déclarent comme crédits (avec le signe positif), tandis que les augmentations nettes en actifs et les décroissances nettes en passifs se déclarent comme débits (avec le signe négatif). Par conséquent, les flux de l'IED avec un signe négatif indiquent qu'au moins une des trois catégories de l'IED est négative et n'est pas contrebalancée par les valeurs positives des autres catégories. Il s'agit alors de désinvestissements ou de réductions d'investissement.

- (1) Les données de 1988 à 1991 se réfèrent seulement à la Slovaquie, à l'exception des flux entrants qui comprennent aussi d'autres Républiques de l'ex Yougoslavie (RSF).
- (2) Données partielles : elles ne couvrent pas la totalité du territoire de l'URSS.
- (3) Les données de 1970 à 2001 se réfèrent à l'Union économique belgo-luxembourgeoise ; à partir de 2002 les données couvrent uniquement la Belgique.

## 7.6.1 Official financial flows from bilateral and multilateral sources by country and geographical region

Sources:  
- OECD, *OLISnet* online statistical database

Notes:

- (1) Sum of "Total ODA Net; total donors" and "Total OOF Net; total donors". It represents the total net disbursements by the official sector at large to the recipient country.
- (2) Total ODA Net; total donors:  
The Total Official Development Assistance (ODA) includes grants and loans to countries and territories on the "DAC List of ODA Recipients" which are:
  - undertaken by the official sector;
  - with promotion of economic development and welfare as the main objective;
  - at concessional financial terms (if a loan, have a grant element of at least 25 per cent).
- (3) Total OOF Net; total donors:  
The Other Official Flows (OOF) are transactions by the official sector whose main objective is other than development motivated, or, if development motivated, whose grant element is below the 25% threshold which would make them eligible to be recorded as ODA. The main classes of transactions included here are official export credits, official sector equity and portfolio investment, and debt reorganisation undertaken by the official sector at non-concessional terms (irrespective of the nature or the identity of the original creditor).
- (4) Total Donors is the sum of the three following donor types:
  - DAC Bilateral Donors: The Development Assistance Committee (DAC) is the Committee of the OECD which deals with development co-operation matters. It consists of 23 Member countries.
  - Multilateral Donors (i.e. AfDB, IBRD, IMF, UNDP).
  - Other Donors: the Non-DAC Bilateral Donors (i.e. Hungary, Lithuania, Turkey).
- (5) Developing economies is the sum of:
  - Developing economies: Africa
  - Developing economies: America
  - Developing economies: Asia
  - Developing economies: Oceania
  - Developing economies n.e.s.
- (6) "n.e.s." refers to Unallocated or Unspecified economies, i.e. a group of recipient economies and not an individual recipient economy.

## 7.6.1 Flux financiers publics bilatéraux et multilatéraux par pays et régions géographiques

Sources :  
- OCDE, base de données en ligne *OLISnet*

Notes :

- (1) Somme de "APD totale nette ; tous donateurs" et de "Flux AASP nets ; tous donateurs". Cet agrégat correspond aux versements nets effectués par le secteur public dans son ensemble aux pays bénéficiaires considérés.
- (2) APD totale nette ; tous donateurs :  
Par aide publique au développement (APD), on entend l'ensemble des apports de ressources qui sont fournis aux pays qui figurent sur la "Liste des bénéficiaires de l'APD établie par le CAD" et qui répondent aux critères suivants :
  - a) être dispensés dans le but essentiel de favoriser le développement économique et l'amélioration du niveau de vie dans les pays en développement ; et
  - b) revêtir un caractère de faveur et comporter un élément de libéralité d'au moins 25 pour cent.
- (3) Flux AASP nets ; tous donateurs :  
Autres apports du secteur public (AASP) : il s'agit des opérations du secteur public dont le but essentiel est autre que le développement ou qui, tout en visant à favoriser le développement, sont assorties d'un élément de libéralité inférieur au seuil de 25 pour cent à partir duquel elles auraient pu être notifiées comme de l'APD. Les principales catégories d'opérations couvertes dans les AASP sont les crédits publics à l'exportation, les prises de participation et les investissements de portefeuille du secteur public et le réaménagement de la dette effectué par le secteur public aux conditions du marché (et ce, quelle que soit la nature ou l'identité du créancier initial).
- (4) "Tous Donneurs" est la somme des 3 types de donateurs suivants :
  - Donneurs Bilatéraux du CAD : Le Comité d'aide au développement (CAD) est la principale instance chargée, à l'OCDE, des questions relatives à la coopération avec les pays en développement. Le CAD regroupe 23 pays membres.
  - Donneurs Multilatéraux (i.e. AfD, BIRD, FMI, PNUD).
  - Autres Donneurs : les Donneurs Bilatéraux non-membres du CAD (i.e. Hongrie, Lituanie, Turquie).
- (5) Économies en développement est la somme de :
  - Économies en développement : Afrique
  - Économies en développement : Amérique
  - Économies en développement : Asie
  - Économies en développement : Océanie
  - Économies en développement n.d.a.
- (6) "n.d.a." se réfère à des économies "Non ventilées" ou "Non spécifiées", c-à-d un groupe d'économies bénéficiaires et non pas une économie bénéficiaire individuelle.

## 7.6.2 Official financial flows from bilateral and multilateral sources to developing economies by economic grouping

### Sources:

- OECD, *OLISnet* online statistical database

### Notes:

- The groupings presented in this table do not include "n.e.s." recipient countries.
- (1) Sum of "Total ODA Net; total donors" and "Total OOF Net; total donors". It represents the total net disbursements by the official sector at large to the recipient country.
  - (2) Total ODA Net; total donors:  
The Total Official Development Assistance (ODA) includes grants and loans to countries and territories on the "DAC List of ODA Recipients" which are:
    - undertaken by the official sector;
    - with promotion of economic development and welfare as the main objective;
    - at concessional financial terms (if a loan, have a grant element of at least 25 per cent).
  - (3) Total OOF Net; total donors:  
The Other Official Flows (OOF) are transactions by the official sector whose main objective is other than development motivated, or, if development motivated, whose grant element is below the 25% threshold which would make them eligible to be recorded as ODA. The main classes of transactions included here are official export credits, official sector equity and portfolio investment, and debt reorganisation - undertaken by the official sector at non-concessional terms (irrespective of the nature or the identity of the original creditor).
  - (4) Total Donors is the sum of the three following donor types:
    - DAC Bilateral Donors: The Development Assistance Committee (DAC) is the Committee of the OECD which deals with development co-operation matters. It consists of 23 member countries.
    - Multilateral Donors (i.e. African Development Bank, International Bank for Reconstruction and Development, International Monetary Fund, United Nations Development Programme).
    - Other Donors: the Non-DAC Bilateral Donors (i.e. Hungary, Lithuania, Turkey).
  - (5) Developing economies is the sum of:
    - Developing economies: Africa
    - Developing economies: America
    - Developing economies: Asia
    - Developing economies: Oceania
    - Developing economies n.e.s.

## 7.6.2 Flux financiers publics bilatéraux et multilatéraux à destination des économies en développement par groupements économiques

### Sources :

- OCDE, base de données en ligne *OLISnet*

### Notes :

- Les groupements présentés dans ce tableau n'incluent pas les pays bénéficiaires "n.d.a."
- (1) Somme de "APD totale nette ; tous donateurs" et de "Flux AASP nets ; tous donateurs". Cet agrégat correspond aux versements nets effectués par le secteur public dans son ensemble aux pays bénéficiaires considérés.
  - (2) APD totale nette ; tous donateurs :  
Par aide publique au développement (APD), on entend l'ensemble des apports de ressources qui sont fournis aux pays qui figurent sur la "Liste des bénéficiaires de l'APD établie par le CAD" et qui répondent aux critères suivants :
    - a) être dispensés dans le but essentiel de favoriser le développement économique et l'amélioration du niveau de vie dans les pays en développement ; et
    - b) revêtir un caractère de faveur et comporter un élément de libéralité d'au moins 25 pour cent.
  - (3) Flux AASP nets ; tous donateurs :  
Autres apports du secteur public (AASP) : il s'agit des opérations du secteur public dont le but essentiel est autre que le développement ou qui, tout en visant à favoriser le développement, sont assorties d'un élément de libéralité inférieur au seuil de 25 pour cent à partir duquel elles auraient pu être notifiées comme de l'APD. Les principales catégories d'opérations couvertes dans les AASP sont les crédits publics à l'exportation, les prises de participation et les investissements de portefeuille du secteur public et le réaménagement de la dette effectué par le secteur public aux conditions du marché (et ce, quelle que soit la nature ou l'identité du créancier initial).
  - (4) Tous Donneurs est la somme des 3 types de donateurs suivants :
    - Donneurs Bilatéraux du CAD : Le Comité d'aide au développement (CAD) est la principale instance chargée, à l'OCDE, des questions relatives à la coopération avec les pays en développement. Le CAD regroupe 23 pays membres.
    - Donneurs Multilatéraux (i.e. Banque africaine de développement, Banque internationale pour la reconstruction et le développement, Fonds monétaire international, Programme des Nations Unies pour le développement).
    - Autres Donneurs : les Donneurs Bilatéraux non-membres du CAD (i.e. Hongrie, Lituanie, Turquie).
  - (5) Économies en développement est la somme de :
    - Économies en développement : Afrique
    - Économies en développement : Amérique
    - Économies en développement : Asie
    - Économies en développement : Océanie
    - Économies en développement n.d.a.

Notes:

- (1) Long-term debt is defined as debt that has an original or extended maturity of more than one year and that is owed to nonresidents and repayable in foreign currency, goods, or services.  
Long-term debt has three components:  
- "Public debt";  
- "Publicly guaranteed debt";  
- "Private nonguaranteed debt".  
In this table, "Public debt" and "Publicly guaranteed debt" are aggregated.  
Outstanding long-term debt at year end is the sum of long-term debt outstanding and long-term debt disbursed.
- (2) "Public debt" is an obligation of a public debtor, including the national government, a political subdivision (or an agency of either), and autonomous public bodies.  
"Publicly guaranteed debt" is an external obligation of a private debtor that is guaranteed for repayment by a public entity.  
In this table, "Public debt" and "Publicly guaranteed debt" are aggregated.  
Data of "Public and publicly guaranteed debt" is shown by type of creditor: official creditors and private creditors.
- (3) "Public and publicly guaranteed debt" from official creditors includes loans from governments (referred to as bilateral creditors) and loans from international organizations (referred to as multilateral creditors).  
Government loans include loans from governments and their agencies (including central banks), loans from autonomous bodies, and direct loans from official export credit agencies.  
Loans from international organizations include loans and credits from the World Bank, regional development banks, and other multilateral and intergovernmental agencies.  
Excluded are loans from funds administered by an international organization on behalf of a single donor government; these are classified as loans from governments.
- (4) "Public and publicly guaranteed debt" from private creditors includes:  
- "Bonds" that are either publicly issued or privately placed;  
- "Commercial bank loans" from private banks and other private financial institutions;  
- "Other private credits" from manufacturers, exporters, and other suppliers of goods, and bank credits covered by a guarantee of an export credit agency.
- (5) Private nonguaranteed long-term debt outstanding and disbursed is an obligation of a private debtor that is not guaranteed for repayment by a public entity.
- (6) Disbursements on long-term debt are drawings on loan commitments during the year specified.
- (7) Long-term debt service payments are the sum of principal repayments and interest payments in the year specified.
- (8) Net transfers on long-term debt are "disbursements" minus "debt service payments".

Notes :

- (1) La dette à long terme a une durée de remboursement (d'origine ou différée) supérieure à une année, et son amortissement est dû, en monnaies convertibles ou en nature, à des créanciers non-résidents.  
La dette à long terme a trois composantes :  
- "Dette publique";  
- "Dette garantie par l'État";  
- "Dette du secteur privé non garantie".  
Dans ce tableau, la "dette publique" et la "dette garantie par l'État" sont agrégées.
- (2) La "dette publique" est une dette contractée par le secteur public, y compris le gouvernement, une entité politique et d'autres organismes publics autonomes.  
La "dette garantie par l'État" est une dette contractée par le secteur privé, dont l'amortissement est garanti par une entité publique.  
Dans ce tableau, "dette publique" et "dette garantie par l'État" sont agrégées.  
Les données de la "dette publique et garantie par l'État" sont indiquées par types de créanciers : créanciers publics et créanciers privés.
- (3) La "dette publique et garantie par l'État" octroyée par les créanciers publics inclut les prêts des gouvernements (appelés créanciers bilatéraux) et les prêts des organisations internationales (appelées créanciers multilatéraux).  
Les prêts des gouvernements incluent les prêts des gouvernements et des organismes publics (y compris les banques centrales), les prêts provenant d'entités autonomes et les prêts octroyés directement par des organismes publics de crédits à l'exportation.  
Les prêts des organisations internationales incluent les prêts et les crédits de la Banque mondiale, des banques régionales de développement, et d'autres organismes multilatéraux et intergouvernementaux. Ne sont pas compris les prêts provenant des fonds administrés par une organisation internationale, pour le compte d'un gouvernement ; ceux-ci sont classés sous la rubrique des prêts des gouvernements.
- (4) La "dette publique et garantie par l'État" octroyée par les créanciers privés comprend :  
- "Obligations" qui sont soit des émissions publiques, soit des placements privés ;  
- "Prêts des banques commerciales" octroyés par des banques privées et par d'autres entités financières ;  
- "Autres crédits privés" provenant du secteur manufacturier, du secteur des exportations, et d'autres fournisseurs de biens, ainsi que des crédits bancaires couverts par un organisme de crédits à l'exportation.
- (5) La dette du secteur privé non-garantie encourue et décaissée, est une dette contractée par le secteur privé, dont l'amortissement n'est pas garanti par une entité publique.
- (6) Les décaissements de la dette à long terme sont les tirages sur les engagements de la dette effectués au cours de l'année spécifiée.
- (7) Les paiements du service de la dette à long terme sont la somme du remboursement du principal et du paiement des intérêts, effectués au cours de l'année spécifiée.
- (8) Les transferts nets sont les "décaissements" moins les "paiements du service de la dette".

Notes:

- Data in this table are shown as percentage of GDP / Value added at current prices in US dollars.
- For countries' notes on GDP / Value added breakdown, see: <http://unstats.un.org/unsd/snaama/downloads/Download-GDPcurrent-USD-countries.xls>
- (1) The breakdown in shares by type of expenditure is shown as percentage of GDP. The breakdown in shares of GDP might not add-up to 100 percent due to statistical discrepancies.
- (2) The breakdown in shares by kind of economic activity is shown as percentage of total value added.
- (3) Includes agriculture, hunting, forestry and fishing (ISIC Revision 3 divisions 01-05).
- (4) Includes mining and quarrying, manufacturing, electricity, gas and water supply, and construction (ISIC Revision 3 divisions 10-45).
- (5) Include all other economic activities (ISIC Revision 3 divisions 50-99).
- (6) Including Western Sahara.

Notes :

- Les données de ce tableau sont indiquées en pourcentage du PIB / Valeur ajoutée aux prix courants en dollars des États-Unis.
- Pour les notes des pays sur la ventilation du PIB / Valeur ajoutée, se référer à: <http://unstats.un.org/unsd/snaama/downloads/Download-GDPcurrent-USD-countries.xls>
- (1) La ventilation par catégories de dépense est calculée en pourcentage du PIB. La somme des pourcentages du PIB ventilé peut ne pas être égale à 100 à cause des écarts statistiques.
- (2) La ventilation par branches d'activité économique est calculée en pourcentage de la valeur ajoutée totale.
- (3) Inclut l'agriculture, la chasse, la sylviculture et la pêche (CITI Révision 3 divisions 01-05).
- (4) Inclut les activités extractives, les activités de fabrication, la production et distribution d'électricité, de gaz et d'eau et la construction (CITI Révision 3 divisions 10-45).
- (5) Incluent toutes les autres activités économiques (CITI Révision 3 divisions 50-99).
- (6) Y compris le Sahara occidental.

## 8.4.2 Population and labour force of economic groupings

### Sources:

- UN DESA Population Division, *World Population Prospects: The 2010 Revision*
- UN DESA Population Division, *World Population Prospects: The 2009 Revision*
- ILO, *LABORSTA* online database
- FAO, *FAOSTAT* online database
- National sources

Labour force data are derived from activity rates that were based on population estimates and projections of *World Population Prospects: The 2010 Revision*.

The figures for certain groups might be different from those published by the sources, when the UNCTAD definitions for those groups are different.

- Estimates.

### Notes:

- (1) Total population: de facto population in a country, area or region as of 1 July of the year indicated. Figures are presented in thousands.
- (2) Urban population as percentage of total population: population living in areas classified as urban according to the criteria used by each area or country. Data refer to 1st July of the year indicated.
- (3) Total labour force: comprises all persons (both sexes) of age 15 and above.
- (4) Female labour force as percentage of total labour force: comprises all persons of feminine sex of age 15 and above.
- (5) Total labour force in agriculture: is that part (male and female) of the total labour force engaged in or seeking work agriculture, hunting, fishing or forestry.
- (6) Female labour force as percentage of total agriculture labour force: is that part (female) of the total labour force engaged or seeking work in agriculture, hunting, fishing or forestry.

## 8.4.2 Population et main-d'œuvre des groupements économiques

### Sources :

- ONU DAES Division de la population, *World Population Prospects: The Revision 2009*
- BIT, *LABORSTA* base de données en ligne
- FAO, *FAOSTAT* base de données en ligne
- Sources nationales

Les données de la main-d'œuvre sont dérivées des taux d'activité qui sont basés sur des estimations et projections du *World Population Prospects: The 2010 Revision*.

Les chiffres pour certains groupes peuvent être différents de ceux publiés par les sources, lorsque les définitions de la CNUCED de ces groupes sont différentes.

- Estimations.

### Notes :

- (1) Population totale : de facto la population dans un pays ou région au 1er juillet de l'année indiquée. Les chiffres sont présentés en milliers.
- (2) Population urbaine en pourcentage de la population totale : la population au 1er juillet vivant dans une région classée comme urbaine selon les critères définis par une région ou un pays.
- (3) Main-d'œuvre totale : toutes les personnes (hommes et femmes) de 15 ans et plus.
- (4) Main-d'œuvre féminine en pourcentage de la main d'œuvre totale : toutes les personnes de sexe féminin de 15 ans et plus.
- (5) Main-d'œuvre totale dans l'agriculture : la part (hommes et femmes) du total de la main-d'œuvre qui travaille ou cherche du travail dans l'agriculture, la chasse, la pêche ou la sylviculture.
- (6) Main-d'œuvre totale féminine en pourcentage du total de la main-d'œuvre dans l'agriculture : la part (femmes) du total de la main-d'œuvre qui travaille ou cherche du travail dans l'agriculture, la chasse, la pêche ou la sylviculture.
