Notes:

(1) The symbol \*\* indicates the grouping to which the country belongs and the percentage share shown applies. The percentage is the share of exports of each commodity shown by the country in the relevant grouping total exports for that commodity (i.e. "developing", which refers to developing economies; "transition", which refers to transition economies and "developed", which refers to developed economies).

(2) Data are estimated at least for one of the reference years.

Sources :

- Estimations du secrétariat de la CNUCED

Notes :

(1) Le symbole \*\* indique le groupement auquel le pays appartient et par rapport auquel est calculé le pourcentage. Ce pourcentage est la part que représentent les exportations du produit par le pays par rapport aux exportations du même produit par le groupement auquel le pays appartient («developing» se réfère aux économies en développement, «transition» aux économies en transition et «developed» aux économies développées).

(2) Données estimées pour au moins une des années de référence

### 3.3 Concentration and structural change indices of product markets Imports

Sources:

- UNCTAD secretariat calculations based on UN DESA Statistics Division, COMTRADE database and on IMF, *Direction of Trade Statistics*

Notes:

(1) Concentration index:

The Herfindahl-Hirschmann index is a measure of the degree of market concentration. It has been normalized to obtain values ranking from 0 to 1 (maximum concentration), according to the following formula:

$$H_i = \frac{\sqrt{\sum_{j=1}^n \left(\frac{x_{ij}}{X_i}\right)^2} - \sqrt{\frac{1}{n}}}{1 - \sqrt{\frac{1}{n}}}$$

where

$H_i$  = Value of concentration index for product i

$x_{ij}$  = Value of exports or imports for country j and product i

$$X_i = \sum_{j=1}^n x_{ij} \quad \text{and}$$

n = maximum number of individual economies

An index value that is close to 1 indicates a very concentrated market. On the contrary, values closer to 0 reflect a more equal distribution of market shares among exporters or importers.

(2) Structural change index:

This index, ranging from 0 to 1 reveals the structural change in trade for a particular product as compared to the reference year (1995 = 0).

An index value close to 1 indicates a significant change in the composition of exporters (importers). On the contrary, values closer to 0 would demonstrate a higher degree of "traditionality" in the markets over the period concerned.

The value is calculated as follows:

$$I_i = \frac{\sum_j |S_{ij}^1 - S_{ij}^0|}{2}$$

where

$I_i$  = Value of structure index for product i

$S_{ij}^0$  = Share of trade of product i for country j in 1995

$S_{ij}^1$  = Share of trade of product i for the country j in the concerned year

### 3.3 Indices de concentration et de changement structurel des marchés de produits Importations

Sources :

- Calculs du secrétariat de la CNUCED basés sur des données de ONU DAES Division de statistique, COMTRADE et sur FMI, *Direction of Trade Statistics*

Notes :

(1) Indice de concentration :

L'indice Herfindahl-Hirschmann mesure le degré de concentration des marchés.

Il a été normalisé afin d'obtenir des valeurs comprises entre 0 et 1 (concentration maximale), d'après la formule suivante :

$$H_i = \frac{\sqrt{\sum_{j=1}^n \left(\frac{x_{ij}}{X_i}\right)^2} - \sqrt{\frac{1}{n}}}{1 - \sqrt{\frac{1}{n}}}$$

où

$H_i$  = Valeur de l'indice de concentration pour le produit i

$x_{ij}$  = Valeur des exportations ou des importations du pays j pour le produit i

$$X_i = \sum_{j=1}^n x_{ij} \quad \text{et}$$

n = nombre maximum d'économies individuelles

Un indice proche de 1 indique une concentration très forte du marché pour ce produit en particulier. En revanche, une valeur proche de 0 démontre une répartition plus homogène du commerce entre les exportateurs ou les importateurs.

(2) Indice de changement structurel :

Cet indice, dont la valeur est comprise entre 0 et 1, représente les changements de structure du commerce par rapport à une année de référence (1995 = 0).

Une valeur proche de 1 indique un important changement structurel du commerce de ce produit, c'est à dire, une grande variation des parts de marché au sein des exportateurs ou importateurs, par rapport à l'année de référence. Plus la valeur de l'indice est proche de 0, plus la structure du commerce de ce produit est stable.

Il est calculé comme suit :

$$I_i = \frac{\sum_j |S_{ij}^1 - S_{ij}^0|}{2}$$

où

$I_i$  = Valeur de l'indice de changement structurel, pour le produit i

$S_{ij}^0$  = Part du commerce du produit i pour le pays j par rapport au commerce total de ce produit pour l'année 1995

$S_{ij}^1$  = Part du commerce du produit i pour le pays j, par rapport au commerce total de ce produit pour l'année concernée

## 4.1.1 Export and import concentration and diversification indices of countries and geographical regions

### Sources:

- UNCTAD secretariat calculations based on ONU DESA Statistics Division, Comtrade database

### Notes:

- (1) Number of products exported (or imported) at the three-digit SITC, Rev. 2 level; this figure includes only those products that are greater than \$100,000 or more than 0.3 per cent of the country's total exports (or imports).

Data for the country groupings are calculated as weighted averages of individual countries data, including those that are estimated and not shown separately.

- (2) The diversification index signals whether the structure of exports or imports by product of a given country or group of countries differ from the structure of product of the world. This index that ranges from 0 to 1 reveals the extent of the differences between the structure of trade of the country or country group and the world average. The index value closer to 1 indicates a bigger difference from the world average.

Diversification index is computed by measuring absolute deviation of the country share from world structure, as follows:

$$S_j = \frac{\sum_i |h_{ij} - h_i|}{2}$$

where  $h_{ij}$  = share of product  $i$  in total exports or imports of country or country group  $j$

$h_i$  = share of product  $i$  in total world exports or imports.

This index is a modified Finger-Kreinin measure of similarity in trade. For more information, please consult the article of Finger, J. M. and M. E. Kreinin (1979), "A measure of 'export similarity' and its possible uses" in the *Economic Journal*, 89: 905-12.

- (3) Concentration index, also named Herfindahl-Hirschmann index, is a measure of the degree of market concentration. It has been normalized to obtain values ranking from 0 to 1 (maximum concentration), according to the following formula:

$$H_j = \frac{\sqrt{\sum_{i=1}^n \left(\frac{x_{ij}}{X_j}\right)^2} - \sqrt{1/n}}{1 - \sqrt{1/n}}$$

where  $H_j$  = country or country group index

$X_j$  = value of exports for country  $j$  and product  $i$

$$X_j = \sum_{i=1}^n x_{ij}$$

and  $n$  = number of products (SITC Revision 3 at 3-digit group level).

### 4.1.1 Indices de concentration et de diversification des exportations et importations des pays et des régions géographiques

Sources :

- Calculs du secrétariat de la CNUCED fondés sur des données de ONU DAES Division de statistique, base de données Comtrade

Notes :

(1) Nombre de produits au niveau de groupes de la CTCI (rév. 2, position à 3 chiffres) exportés (ou importés) par chaque pays ; cependant, seuls les produits ayant une valeur supérieure à 100.000 dollars ou comptant pour plus de 0,3 % des exportations (ou des importations) totales du pays sont inclus.

Les indices de concentration et de diversification calculés au niveau des groupes de pays et du monde sont les moyennes arithmétiques des indices respectifs des pays, pondérées par la valeur de leurs exportations.

(2) L'indice de Diversification indique si la structure par produits des exportations d'un pays ou groupe de pays diverge peu ou beaucoup de la structure par produits des exportations totales dans le monde. Cet indice dont la valeur est comprise entre de 0 à 1, révèle l'ampleur des différences entre la structure des échanges d'un pays ou du groupe de pays et la moyenne mondiale. Plus l'indice est proche de 1, plus la divergence est forte.

L'indice de diversification mesure la déviation absolue de la structure du pays par rapport à la structure mondiale comme ci-dessous :

$$S_j = \frac{\sum_i |h_{ij} - h_i|}{2}$$

où  $h_{ij}$  = part du produit  $i$  dans le total des exportations (ou importations) du pays  $j$

$h_i$  = part du produit  $i$  dans le total des exportations (ou importations) mondiales.

Cet indice est une variante de l'indicateur de Finger-Kreinin sur la similarité de la structure du commerce. Pour plus d'information, veuillez consulter l'article de Finger, J. M. et M. E. Kreinin (1979), "A measure of 'export similarity' and its possible uses", dans *Economic Journal*, 89: 905-12.

(3) L'indice de concentration, aussi appelé indice de Herfindahl-Hirschmann, mesure le degré de concentration des marchés. Il a été normalisé afin d'obtenir des valeurs comprises entre 0 et 1 (concentration maximale), d'après la formule suivante :

$$H_j = \frac{\sqrt{\sum_{i=1}^n \left( \frac{x_{ij}}{X_j} \right)^2} - \sqrt{1/n}}{1 - \sqrt{1/n}}$$

où  $H_j$  = Indice du pays ou groupe de pays

$X_{ij}$  = valeur des exportations du pays  $j$  pour le produit  $i$

$$X_j = \sum_{i=1}^n x_{ij}$$

et  $n$  = nombre de produits (de la CTCI rév., position à 3 chiffres).

#### 4.1.2 Export and import concentration and diversification indices of economic groupings

| Region,<br>country or territory   | Exports - Exportations                |                                     |                                   |                                       |                                     |                                   |

#### Sources:

- ECLAC, *CEPALSTAT* external trade deflator
- IMF, *International Financial Statistics* on CD-ROM
- U.S. Bureau of Labor Statistics, external trade prices indices
- Unit value indices of Japan Customs and price indices of Bank of Japan
- UNCTAD, *Commodity Price Statistics*
- UNCTAD, *Merchandise Trade Matrix*
- UNCTAD secretariat estimates

#### Notes:

- (1) To improve data coverage, especially for the latest periods, the following procedure was used in the calculation of unit value indices:
- A set of average prices indices at SITC (Revision 3, 3-digit) group level was constructed using UNCTAD, *Commodity Price Statistics*, international and national sources and UNCTAD secretariat estimates.
  - At the country level, unit value indices were calculated using previous year's trade values at the SITC 3-digit level, available in table 3.2 as weights.
- In some instances these indices may differ from the estimates published in official sources, since the main aim is to provide tentative estimates for most countries on a comparable basis.

Notes :

- (1) Afin d'améliorer la couverture des données et spécialement pour les années récentes, la méthode suivante a été utilisée pour le calcul des valeurs unitaires :
- Un ensemble d'indices de prix moyens au niveau des groupes de la CTCI (révision 3, position à 3 chiffres) a été construit en utilisant des données de CNUCED, Statistiques des produits de base, des sources internationales et nationales ainsi que des estimations du secrétariat de la CNUCED.
  - Au niveau des pays individuels, les indices de la valeur unitaire ont été calculés en utilisant comme pondération les valeurs des exportations et des importations de l'année précédente, disponibles dans la table 3.2.
- Dans certains cas ces indices peuvent différer des estimations publiées dans les sources officielles, le but principal étant de fournir des estimations approximatives et comparables pour la plupart des pays.

**4.2.1 Terms of trade indices and purchasing power indices of exports of countries and geographical regions**  
2000 = 100

##### Notes:

- (1) The "net barter" terms of trade, defined as the ratio of the export unit value index to the import unit value index.
- (2) The purchasing power index of exports is the value index of exports deflated by the import unit value index.

#### 4.2.1 Indices des termes de l'échange et du pouvoir d'achat des exportations des pays et des régions géographiques 2000 = 100

Notes :

- (1) Le terme de l'échange, appelé aussi "troc net", est le rapport de l'indice de la valeur unitaire des exportations à l'indice de la valeur unitaire des importations exprimé en pourcentage.  
(2) Le pouvoir d'achat des exportations est l'indice de la valeur des exportations corrigé par l'indice de la valeur unitaire des importations.

Notes:

- (1) Product categories are defined in terms of SITC Revision 3, and all corresponding Harmonized System (HS) 6-digit codes have been aggregated for each category.
- (2) Simple average for each product group calculated from simple average at HS 6-digit level.
- (3) Weighted average for each product group calculated from simple average at HS 6-digit level. Country's own imports at HS 6-digit level for corresponding years are used as weights. Where imports are not reported, mirror imports have been compiled using exports of partner countries.
- (4) From 2008 onwards, member of the European Union.
- (5) From 2004 onwards, member of the European Union.
- (6) For the union, data refer to the composition of the group during that year.

Notes :

- (1) Les catégories de produits sont définies sur la base de la CTCI, révision 3, et pour chaque catégorie, les codes à 6 chiffres du Système harmonisé (SH) correspondants ont été agrégés.
- (2) Moyenne arithmétique, pour chaque catégorie de produits, calculée à partir des moyennes arithmétiques au niveau du code à 6 chiffres du SH.
- (3) Moyenne arithmétique pondérée, pour chaque catégorie de produits, calculée à partir des moyennes simples au niveau du code à 6 chiffres du SH. Pour chaque année, les coefficients de pondération sont les importations de chaque marché au niveau du code à 6 chiffres du SH. Lorsque les importations n'étaient pas disponibles, elles ont été évaluées par les données miroir basées sur les exportations des pays partenaires.
- (4) À partir de 2008, membre de l'Union européenne.
- (5) À partir de 2004, membre de l'Union européenne.
- (6) Pour une année donnée, les tarifs de l'union se réfèrent à la composition du groupe durant cette année.

### Notes:

- (1) Years 1990, 1991, 1992: the breaks in series result from the data reporting of the former Yugoslavia (SFR) and the countries that succeeded from it, as well as from the inclusion of the figures of the Russian Federation, while the former USSR data are not available.
- (2) Data from 1980 to 1994 inclusive refer to Belgium-Luxembourg Economic Union and from 1995 onwards to Belgium only. Year 2007: break in series

### Notes :

- (1) Années 1990, 1991, 1992 : la rupture de série est due 1) aux chiffres reportés par l'ex Yougoslavie (RSF) et les pays qui lui ont succédé, 2) à l'inclusion des données de la Fédération de Russie, les données de l'ancienne URSS n'étant pas disponibles.
- (2) Les données de 1980 à 1994 se réfèrent à l'Union belgo-luxembourgeoise et à partir de 1995 uniquement à la Belgique. Année 2007 : rupture de série.

## 5.1.2 Value of exports and imports of services of economic groupings

#### Notes:

- (1) DWT (deadweight ton) is the weight measure of a vessel's carrying capacity. It includes cargo, fuel and stores.
- (2) Including passenger/cargo combined.
- (3) Year 2002: break in series; from 2002 onwards, ships registered under the flag of the Marshall Islands (developing country) are shown separately; before they were included with the United States of America (developed country).
- (4) From 2002 onwards, ships registered under the flag of the Marshall Islands are shown separately; before they were included with the United States of America.
- (5) Year 2002: break in series; from 2002 onwards, ships registered under the flag of the Marshall Islands are shown separately; before they were included with the United States of America.
- (6) Including San Marino.
- (7) UNCTAD has grouped the 10 major open and international registries to include the 10 largest fleets with more than 90 per cent foreign-controlled tonnage. Accordingly, the following 10 economies appear in the group: Antigua and Barbuda, Bahamas, Bermuda, Cyprus, Isle of Man, Liberia, Malta, Marshall Islands, Panama, and Saint Vincent and Grenadines.  
From 1995 onwards, the data for this group cover also the fleet of the Isle of Man, included otherwise with figures of the United Kingdom and not shown separately.
- (8) Before 1995, Isle of Man is included.

#### Notes :

- (1) TPL (Tonne de port en lourd) : c'est une mesure de poids de la capacité de charge d'un navire. Il inclut la cargaison, le carburant et les magasins.
- (2) Y compris les cargos mixtes.
- (3) Année 2002 : rupture de série ; les navires immatriculés aux Îles Marshall (pays en développement) sont présentés séparément à partir de 2002 ; avant, ils étaient compris dans les chiffres des États-Unis (pays développé).
- (4) Les navires immatriculés aux Îles Marshall sont présentés séparément à partir de 2002 ; avant, ils étaient compris dans les chiffres des États-Unis.
- (5) Année 2002 : rupture de série ; les navires immatriculés aux Îles Marshall sont présentés séparément à partir de 2002 ; avant, ils étaient compris dans les chiffres des États-Unis.
- (6) Y compris Saint-Marin.
- (7) La CNUCED a regroupé les pays de libre immatriculation en incluant les 10 plus grandes flottes dont le tonnage, contrôlé par les non-résidents, dépasse 90% du tonnage total du pays. Par conséquent, les 10 pays suivants font partie du groupe : Antigua-et-Barbuda, Bahamas, Bermudes, Chypre, Îles Marshall, Île de Man, Libéria, Malte, Panama et Saint-Vincent-et-les Grenadines. À partir de 1995, les données de ce groupe comprennent aussi la flotte de l'île de Man. Avant cette date, les données n'étaient pas présentées séparément car elles étaient comprises dans la flotte du Royaume-Uni.
- (8) Y compris l'île de Man avant 1995.

Sources:

- The prices used in the calculation of the indices shown in this table are extracted from *UNCTADstat* Commodity Price Statistics

Notes:

- The group indices include all commodities shown except for those with an asterisk (\*).
- The average annual indices are calculated from monthly data and may not correspond to the average from quarterly data.

- (1) Dollars per metric ton (unless otherwise specified).
- (2) Cents per pound.
- (3) Cents per kilogram.
- (4) Dollars per cubic meter.
- (5) Cents per sheet.
- (6) Cents per Fe unit.
- (7) Dollars per metric ton unit of WO<sub>3</sub>.
- (8) Dollars per troy ounce.
- (9) Cents per troy ounce.
- (10) Dollars per barrel.

- For specifications, see next page.

### Specifications

#### Food

1. Wheat: Argentina, Trigo Pan Upriver, f.o.b.
2. Wheat: United States, no. 2, Hard Red Winter (ordinary), f.o.b. Gulf ports.
3. Maize: Argentina, Rosario, f.o.b.
4. Maize: United States, no. 3 yellow, f.o.b. Gulf ports.
5. Rice: Thailand, white milled, 5 % broken, nominal price quotes, f.o.b. Bangkok.
6. Sugar: Caribbean ports, f.o.b. bulk basis (I.S.A.).
7. Beef: Australia and New-Zealand, frozen and boneless, 85 % visible lean, U.S. import price, f.o.b. port of entry.
8. Bananas: Central America and Ecuador, fresh, U.S. importer's price, f.o.b. U.S. ports.
9. Pepper: Muntok, white, fair average quality (faq) spot  
Prior to June 2003, Singapour.
10. Soybean meal: Hamburg, 44/45% protein, f.o.b. ex-mill.
11. Fish meal: Any origin, 64/65% protein, Bremen free carrier price.  
Prior to March 2006, cost and freight Hamburg.

#### Tropical beverages

12. Coffee: Colombian mild Arabicas, ex-dock New York (I.C.A.).
13. Coffee: Brazilian and other natural Arabicas, ex-dock New York (I.C.A.).
14. Coffee: Other mild Arabicas, ex-dock New York (I.C.A.).
15. Coffee: Robustas, ex-dock New York (I.C.A.).
16. Coffee: Composite indicator price 1976 (I.C.A.).
17. Cocoa: Average of daily prices, New York/London, 3 months futures (I.C.C.A.).
18. Tea: Best Pekoe Fannings 1, Mombasa auction prices.

#### Vegetable oils and oilseeds

19. Soybeans: United States, no. 2 yellow, c.i.f. Rotterdam.
20. Soybean oil: Any origin, crude oil, the Netherlands, f.o.b. ex-mill.
21. Sunflower oil: European Union, f.o.b. N.W. European ports.
22. Groundnut oil: Any origin, c.i.f. Rotterdam.
23. Copra: Philippines/Indonesia, bulk, c.i.f. N.W. European ports.
24. Coconut oil: Philippines, c.i.f. Rotterdam.
25. Palm kernel oil: Malaysia, c.i.f. Rotterdam.
26. Palm oil: generally Indonesia, 5% ffa, c.i.f. N.W. European ports.

#### Agricultural raw materials

27. Linseed oil: Any origin, ex-tank, c.i.f. Rotterdam.
28. Tobacco: Unmanufactured tobacco, US general import price.
29. Cotton: Sudan, Barakat, X4B, CFR Far Eastern quotations.  
Prior to August 2005, c.i.f. North Europe.
30. Cotton: United States, Memphis/Eastern Midd 1-3/32", c.i.f. North Europe.
31. Cotton: United States; Memphis/Orleans/Texas, Midd 1-3/32", CFR Far Eastern quotations. Prior to June 2005, Memphis/Orleans/Texas, Midd 1-3/32", c.i.f. North Europe.
32. Cotton: Pakistan, Sind/Punjab, Afzal 1-1/32", c.i.f. North Europe.
33. Cotton: Cotton Outlook Index A, Middling 1-3/32", CFR Far Eastern quotations. Prior to August 2004, c.i.f. North Europe.
34. Cotton: Egypt, Giza 88, good + 3/8, CFR Far Eastern quotations.  
Prior to August 2005, Giza 70, good + 3/8, f.o.b. Alexandria.
35. Wool: fine, 19 micron, Australia.
36. Wool: coarse, 23 micron, Australia.
37. Jute: Bangladesh, Bangladesh White D (BWD), f.o.b. Mongla.
38. Sisal: Tanzania/Kenya, no. 2 & 3 long, f.o.b.  
Prior to 2007, c.i.f. main European ports.
39. Sisal: Tanzania/Kenya no. 3 & UG, f.o.b.  
Prior to 2007, c.i.f. main European ports.
40. Hides: US, Chicago packer's heavy native steers over 53lbs., wholesale dealer's price, f.o.b. shipping point.
41. Non-coniferous woods: United Kingdom, import price index 2005=100, dollar equivalent.
42. Tropical logs: Sapele, loyal and marchand, UK import price, f.o.b. plus commission. Prior to June 2000, Cameroon f.o.b.
43. Tropical sawnwood: Malaysia, Dark Red Meranti, select and better, c.i.f. French ports.
44. Plywood: Southeast Asia, Lauan, 3-ply, Extra, 91 cm x 182 cm x 4 mm, wholesale price, spot Tokyo.
45. Rubber: TSR 20 New York.

### Spécifications

#### Produits alimentaires

1. Blé : Argentine, Trigo Pan Upriver, f.a.b.
2. Blé : États-Unis, Hard Red Winter, n° 2 (ordinaire), f.a.b. ports du Golfe.
3. Maïs : Argentine, Rosario, f.a.b.
4. Maïs : États-Unis, jaune n° 3, f.a.b. ports du Golfe.
5. Riz : Thaïlande, blanchi, 5 % brisures, prix nominal, f.a.b. Bangkok.

**6.2 Instability indices and trends in free-market prices for selected primary commodities**  
2000 = 100

Sources:  
- UNCTAD calculations based on *UNCTADstat* Commodity Price Statistics

Notes:

- (1) The measure of price instability is

$$1/n \sum_{t=1}^n \left[ \frac{|Y(t) - y(t)|}{y(t)} \right] * 100$$

where

$Y(t)$  is the observed magnitude of the variable  
 $y(t)$  is the magnitude estimated by fitting an exponential trend to the observed value  
 $n$  is the number of observations

Accordingly, instability is measured as the percentage deviation of the variables concerned from their exponential trend levels for a given period.

- (2) The growth rate of each period has been calculated using the formula:

$$\log(p) = a + b(t)$$

where

$p$  is the price index and  $t$  is time.

- (3) Constant 2000 dollars (current dollars divided by the United Nations unit value index of manufactured goods exported by developed economies).

**6.2 Indices d'instabilité et tendances des prix sur le marché libre d'une sélection de produits de base**  
2000 = 100

Sources :  
- Calculs du secrétariat de la CNUCED basés sur les statistiques des prix des produits de base de *UNCTADstat*

Notes :

- (1) L'indice d'instabilité des prix est calculé selon

$$1/n \sum_{t=1}^n \left[ \frac{|Y(t) - y(t)|}{y(t)} \right] * 100$$

où

$Y(t)$  est la valeur observée de la variable  
 $y(t)$  est la valeur estimée par ajustement à la tendance exponentielle des valeurs observées  
 $n$  est le nombre d'observations

L'instabilité est le pourcentage de déviation des variables en question par rapport à la ligne de tendance exponentielle pour une période donnée.

- (2) Le taux de croissance de chaque période a été calculé selon la formule :

$$\log(p) = a + b(t)$$

où

$p$  est l'indice de prix et  $t$  le temps.

- (3) Dollars constants 2000 (dollars courants divisés par l'index des Nations Unies de la valeur unitaire des exportations des produits manufacturés par les économies développées).
